

Don't change or weaken the DO NOT CALL Law. The Federal Government's and Wisconsin's DO NOT CALL List has actually made it enjoyable for me to be at home in the evening since the telephone does not ring non-stop with telemarketers trying to waste my personal time.

If the law is changed, I would suggest it be required at the beginning of the telemarketing call that the names of the executives at the telemarketing company and their client be given clearly along with their HOME TELEPHONE Numbers so interested parties could call them at home to see how they like getting pestered with unwanted phone calls.
